Everybody's conscience is clear now-a-days, except the conscience of the war profiteer and that of the American girl who has a lover in France and a lover in this country.

It is a question which brings the greatest aggregate amount of joy to America—the day when a transport from France arrives or the day when the price of butter drops a cent a pound.

It is a singular circumstance that a young woman's feet seem naturally to be so much warmer than her shoulders. The proof of this is seen in the number of girls wearing heavy fur coats with thin silk stockings and pumps.

Ex-President Taft is a prominent member of the League to Enforce Peace. Mr. Taft would be a most desirable member of any organization. Should disturbance arise within a committee, it would be effectively quelled by simply appointing Mr. Taft to sit on the committee.

### AN OPPORTUNITY.

The Times-Herald has followed the progress of the suggested land legislation proposed by Secretary of Interior Lane from its inception. His communication to congress in his annual report last fall was discussed in these columns. Later Secretary of Agriculture Houston had a signed article in this paper commending the proposition and this was followed later with an article written by Secretary Lane. Now comes news this week that President Wilson is going to get behind the bill with favorable prospects that it will become a law.

This bill provides that the Secretary of the Interior have full authority to acquire lands and provide for its reclamation; he is given full authority to co-operate with state or municipal irrigation projects. With such powers, Harney Valley offers an ideal field for operation should this bill become a law. The possibility of acquiring large holdings of land here and participation in its development by installing the Shiloh Irrigation project are attractive and should be given consideration. Let's beat the other fellow to it and invite Secretary Lane to begin operations here where the soldiers may have a big territory to engage in stock raising and farming.

Another snow storm visited this section last Thursday night and now it is an average depth of between one foot and fifteen inches all over this Valley with an abundance in the mountains. Deep snow is reported in Catlow and also on the desert and in the Trout Creek region near Denio it has fallen to great depth, therefore appears to have been general.

A. H. Critchfield, W. R. Byram and Roy Kiphart are over from Catlow. Mr. Critchfield advertised to make proof on his land on February 26, and the party started with the expectation of reaching here for that date but encountered so much snow that it required three days for the journey. "Dad" Byram told The Times-Herald man that Catlow had more moisture than for the previous two years and that the crop prospects are exceptionally fine, therefore it did not make them mad to have to "buck snow."
